DETAILED ACTION

Status of Claims

The rejection of claims 2, 4, 16, 19-23, under 35 U.S.C. 102(b) as being anticipated by Klein et al (US 5,468,405 A), is maintained for the reasons set forth in the rejection mailed 8/27/04.

The rejection of claims 5, 9, 11-13, 24, 25, 32-38, 40, 44 and 46-48 under 35 U.S.C. 103(a) as being unpatentable over Klein et al (US 5,468,405 A), is maintained for the reasons set forth in the rejection mailed 8/27/04.

Response to Arguments

Applicant's arguments filed 8/27/04 have been fully considered but they are not persuasive. The applicant argues that several differences exist between the instantly claimed composition and the composition of the reference.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., avoidin effecting double bonds) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). The process steps have not been given patentable weight, as the applicant is claiming a composition that may be made by any process and not a process. Arguments or conclusionary statements unsupported by factual evidence are

insufficient to establish unexpected results. See *In re Linder*, 173 USPQ 356 (CCPA 1972). The required components are present.
